

Our commitment

Our commitment for our customers to reach the holy grail of Zero Waste to Landfill is one of the fundamental objectives that underpins our thoughts and processes here at briers. We have invested heavily in eco-positive technologies so that we can ensure our customers are firmly on the path towards zero landfill and sustainable waste management. Our unique Material Recycling Facility allow us to capture as much of the recyclable material as possible from the general waste stream, meaning that only the true, non-recyclable element is sent to our partner waste to energy technology plant. Here at briers, we feel this process is 'Best Practice' in sustainable waste management terms and passes on impeccable green credentials to our customers. With doing this gives our customers a guarantee that a minimum of 95% of their waste is recycled in some way or another.

PRICES FOR DRY NON HAZARDOUS WASTE SKIP HIRE

It can be difficult deciding what size of skip you will need for all that waste you have piled up, so here is a quick guide to help you choose the right size skip for the job, but please remember skips can only be filled to the maximum level of the sides of the skip!

If in doubt, we are always happy to show you the various sizes of skips at our Felspar Road, Amington depot. So for an appointment to view the sizes of skips available, further information or to book a skip.

2012 Prices

These are per skip and include VAT where appropriate and are based on where you require the skip with in our operational area.

	TAMWORTH BOROUGH	ZONE 2	ZONE 3
3 CU.YD	£ 95.00	£105.00	£115.00
4 CU YD	£100.00	£110.00	£125.00
6 CU YD	£130.00	£140.00	£155.00
8 CU YD	£160.00	£170.00	£185.00

These prices include VAT where appropriate and are for skip hire for dry non hazardous waste including container rental for up to seven days, beyond this period a rental charge of £2.00 per day will be applied. Notice must be given on ordering of how long you require the skip?

Eg: a day, weekend, week or longer.

Payment- must be made prior or up on delivery of the skip, this can be done by credit or debit card over the phone when ordering, or by giving the delivery driver cash.

Highway or pavement-If the skip is to be placed on the highway or on council property then a Highway Agency permit has to be obtained. These are obtained from the Highways Agency on your behalf at a cost of £30.00. The Highways Agency require seven working days notice in order to allow them to visit and view the site where the skip will be placed, therefore a permit is not guaranteed. Skips that are placed on the highway will be left with cones and possibly lights which you the hirer will be responsible for.

Delivery -We endeavour to offer two hour skip delivery slots between 8am until 4pm Monday to Friday. But as we cannot foresee what delays our drivers may encounter from traffic jams, accidents and other problems we cannot be held responsible for the odd occasion we are late.

Waste- The skips are for dry non hazardous waste only and a list of acceptable waste streams is attached. If you are uncertain regarding any waste please do not hesitate to call us. A few common wastes are now deemed hazardous waste and must be collected and disposed of separately. We are happy to quote and advise our customers who have these types of waste.

Recycling- It is estimated that by 2012 there will be virtually no landfill space left in Britain and therefore the government continues to increase landfill tax annually, which shall rise to £64.00 plus vat per tonne by April 2012. Waste management companies have to pay this as well as a disposal cost on waste sent to landfill.
